WELCOME TO MINERSIA X-32

The **Miningverse** is a galaxy controlled only by a few in power. This world is powered by a precious material called **Serlylium** which was used to greatly push the limits of technology and helped the ones in power to conquer the entire galaxy.

Shortly after the conquest, scientists began to use the powerful magic material to enhance humans genetically. Some of these experiments went well, while others created literal monsters. Our heroes are the few that can use magic and they regularly have to fight others in order to survive.
